

## WiFi accessories - power supply

XP1-MSI-30

### Descrizione

The PoGE system supplies the Xirrus array internally with direct current via the Gigabit Ethernet data interface. As the arrays require more power than other WLAN solutions, use of the PoGE system is imperative and already included in the bundle packages on offer. PoE adapters for use in racks or cabinet systems are available as accessories.

### Applicazione

The Xirrus XP Power over Gigabit Ethernet (PoGE) system is used to provide Xirrus WiFi arrays with a simple and cost-effective remote power supply by way of the data cable.

### Nota

Other accessories on request.
